

Finishing Touch

Microdermabrasion scrub for polished skin

primary benefits

Skin polishing scrub removes top, dead layer of cells to improve the texture of the skin. Great to use in between professional treatments to help maintain and enhance results. Enables moisturizers and other products to more effectively penetrate the skin.

points of difference

Contains Polynesian Volcanic Black Sand (Silica) and Ultra-Fine Pumice to remove dull, dry skin cells. Freshwater Silt helps to remove toxins while nourishing and hydrating the skin.

who benefits

Ideal for normal, combination, oily and mature skin types to help rejuvenate and brighten dull skin.

how to use

Wet face. Using fingertips, apply a quarter-sized amount onto face, avoiding eye area. Gently massage in circular motions, moving outward. Rinse thoroughly and pat skin dry. Use weekly as part of your skincare regimen.
